

State Education Agency Expectations

National Initiative to Advance Health Equity in K-12 Education by Preventing Chronic Disease and Promoting Healthy Behaviors

Priority 2: Emotional Well-Being

State Education Agency (SEA) Team Role in the WSCC Emotional Well-Being Learning Collaborative

In addition to setting state-wide goals to advance health equity and emotional well-being, SEA teams are tasked with providing the structure and organization for the districts to move throughout the LC. State teams do not need to be the experts but can help to facilitate the districts understanding of content/resources and support the districts in implementing their efforts.

NCSMH and CASEL will support SEA teams in identifying **approximately 5 districts** with a commitment to equity and a holistic approach to supporting adults and students in school communities that are underserved, socio-economically marginalized, and disproportionately affected by chronic diseases and the risk factors that cause them.

Role of the State Education Agency Team

- Convene and build a collaborative State-wide team to support emotional well-being.
- Select districts to participate in the yearlong learning collaborative.
- Support district leaders in assembling a multi-disciplinary team including administrators, school mental health professionals, student leaders, families, community partners.
- Complete the State Mental Health Profile on SHAPE and use it to guide action planning for a state level goal.
- Provide structure and support for district teams to complete needs assessment, develop an action plan, and implement goals. This may look like:
 - Holding a state-level meeting once a month to talk about district progress & answer questions.
 - Provide space/time for districts to meet and work on goals.
 - Connect districts to state and local resources to support their goals.
- Support districts in selecting and engaging with youth leaders to participate in the Youth Leadership Academy.
